---

## PROFESSIONAL SUMMARY

Full-Stack Engineer with 10+ years building scalable web and mobile systems across fintech, healthtech, and property management platforms.

Expert in modular architecture, performance optimization, secure payment integrations, and complex API ecosystems including government and banking systems.

Impact highlights:

- 60% reduction in API calls via caching & query optimization
- 40% QA cycle reduction through automation
- Scaled platforms from 300 to 2,000+ users

Interested in performance-driven and scalable distributed systems.

---

## CORE SKILLS

Architecture: Modular Design (MVC), Feature-Based Structure, API Optimization, Secure Data Flows

Frontend: React, TypeScript, Angular, Ionic, Design Systems

Backend & Cloud: Firebase Functions, REST APIs, AWS (Cognito, Lambda, S3)

Integrations: Government APIs, Payment Gateways (Stripe, Produbanco)

Delivery: CI/CD (Fastlane, GitHub Actions), Agile, Remote Collaboration

---

## PROFESSIONAL EXPERIENCE

Mobile Applications Team Leader | Dvora (Remote) | 2020–2024

- Architected 3-layer modular mobile ecosystem (Core, Tenant, Admin)
  - Implemented feature-based structure improving scalability & maintainability
  - Reduced API calls by 60% via caching, batching & query normalization
  - Designed Design System v3 accelerating development velocity
  - Reduced QA time by 40% via automated workflows
  - Scaled user base from 300 to 2,000+ active users
- 

Full-Stack Engineer | Independent Contractor (Remote) | 2017–Present

HabitsAI – HealthTech Platform

- Built wearable-integrated health tracking system
- Developed Firebase Functions backend for biometric data processing
- Implemented AI-driven weekly reporting engine
- Designed decision-tree chatbot system for habit coaching
- Engineered advanced health data visualizations

Digital Insurance Platform – Fintech

- Built insurance quotation SPA (Angular 11) from scratch
  - Integrated national ID and vehicle registry APIs
  - Implemented secure bank payment gateway (Produbanco)
  - Designed token-based quote validation system
  - Delivered secure end-to-end digital workflow
- 

SAP UI5 Consultant & Mobile Developer | IBM Ecuador | 2016–2017

- Developed Bluetooth invoice printing module (60% operational reduction)
  - Delivered enterprise-grade SAP UI5 applications
- 

## EDUCATION & CERTIFICATIONS

Bachelor's in Computer Engineering – UTPL (2023)

English (C1 – Professional Working Proficiency)

IBM & SAP Technical Certifications
